

5 July 2021

Year group closure due to high number of COVID cases – Year 9

Dear Parent

We have been advised by Public Health England that there has been a significant number of confirmed cases of COVID-19 within Year 9. We know that you may find this concerning but we are continuing to monitor the situation and are working closely with Public Health England.

This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness. Please **read the information below very carefully**.

1. All Year 9 students will **not be in school** from **Tuesday 6 July** and will return on **Monday 12 July** at the normal time. This is to reduce risk of cross infection and create a 'circuit break'.
2. Any student in Year 9 that has **been identified a close contact** of a positive cases will have been given **an additional letter and sent home from school already**. This letter states the dates from which your child needs to self-isolate as they are an identified contact. If this is the case for your child, **they must not return on Monday 12 July if this is still within their period of self-isolation**.

Students who have been sent home but are not identified as contacts do not need to self-isolate, we do encourage all students to do twice weekly LFD tests using the kits provided from school or which you can obtain locally.

Provision for lessons

All Year 9 lessons will now move to **LIVE on-line lessons** for the remainder of this week – this will be delivered through **Teams** in the same way as they were in the last school closure period. Guidance on this is found on our website [Coronavirus \(COVID-19\) \(theacademycarlton.org.uk\)](http://theacademycarlton.org.uk).

If your child has an issue accessing these lessons due to an issue with their username and password, please email ictrequests@theacademycarlton.org who will endeavour to help them as quickly as possible.

If your child does not have access to a device for accessing live lessons, please contact Mrs Watson at l.watson@theacademycarlton.org. Students will be set homework on Satchel One and they can also access resources to support learning outside of lessons, and especially in the case of having any issues accessing live lessons using Student SharePoint. Help for using this is also found on our website as above.

Students on Free School Meals

We will issue all Year 9 students who are currently eligible for free school meals with a £15 Tesco voucher as we have done during the lockdown and holiday periods. These will be sent you asap today.

What to do if your child develops symptoms of COVID 19

If your child develops symptoms of COVID-19, they should remain at home for at least 10 days from the date when their symptoms appeared. Anyone with symptoms will be eligible for a PCR test (the normally available test type) and this can be arranged via <https://www.nhs.uk/ask-for-acoronavirus-test> or by calling 119.

All other household members who remain well, must stay at home and not leave the house for 10 days. This includes anyone in your 'Support Bubble'.

Further information is available at: <https://www.gov.uk/government/publications/covid-19-stay-at-homeguidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

The household isolation period includes the day the first person in your household's symptoms started (or the day their test was taken if they did not have symptoms) and the next 10 full days. This means that if, for example, your 10 day isolation period starts on the 15th of the month, your isolation period ends at 23:59 hrs on the 25th and you can return to your normal routine.

Household members should not go to work, school or public areas and exercise should be taken within the home. If you require help with buying groceries, other shopping or picking up medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online. Household members staying at home for 10 days will greatly reduce the overall amount of infection the household could pass on to others in the community

If you are able, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period.

Symptoms

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your child does develop symptoms, you can seek advice from the nhs.uk website at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/>. If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID19
Do

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

Further Information

Further information is available at <https://www.nhs.uk/conditions/coronavirus-covid-19/>

Yours sincerely

Richard Pierpoint
